PROFESSIONAL SUMMARY

Data and analytics professional delivering business intelligence, process automation, and decision support within global pharmaceutical and supply chain operations. Skilled in Python, SQL, Power BI, Excel, SAP HANA, and SAP, with hands-on experience building automated workflows, dashboards, analytical models, and operational datasets. Proven record of turning complex manual processes into reliable solutions with measurable efficiency and financial impact.

TECHNICAL SKILLS

DATA ANALYTICS & BI | SQL, Power BI, DAX, Power Query, Excel, Data Visualization, KPI Development, Statistical Analysis, Forecasting

PYTHON & AUTOMATION | Python, Pandas, NumPy, Scikit-learn, Process Automation, Git

DATA & ENTERPRISE SYSTEMS | ETL, SAP HANA, SAP, Oracle SQL, Power Automate, SharePoint

BUSINESS DOMAIN | Supply Chain Analytics, Inventory Analysis, Material Planning, Procurement, Logistics, Scenario Analysis

PROFESSIONAL EXPERIENCE

OEA Logistic Analyst Jr. - Material Planning (PPM) | Novo Nordisk | Jul 2026 - Present

- Analyze production demand, inventory, purchase orders, purchase requisitions, lead times, and inbound forecasts using **SQL**, **SAP HANA**, GBT, and Excel to identify shortages, excess inventory, delays, and purchasing needs.
- Develop **Python** automation for inventory calculations, material-requirements analysis, and production-planning scenarios, reducing manual effort and improving the speed and reliability of operational analysis.
- Build **Power BI** dashboards, Excel models, **SQL** datasets, and analytical reports to monitor material availability, inventory risk, and future requirements.
- Evaluate what-if scenarios involving production-plan changes, supplier delays, quality deviations, and supply constraints to assess downstream impacts on inventory, procurement, and future orders.

Data Analytics Intern - Supply Chain | Novo Nordisk | Feb 2025 - Jul 2026

- Built an end-to-end **Python** and **SAP** workflow for data extraction, processing, and export documentation, reducing approximately **900 manual steps to 7** and daily execution time from **68 minutes to 2 minutes (over 97%)**.
- Delivered estimated annual savings of **DKK 60,000** while reducing operational errors and export-documentation risk; the initiative received internal continuous-improvement recognition.
- Developed **Power BI** datasets, dashboards, and KPIs for logistics, transportation modes, lead time, and cost opportunities; analyses supported increasing ocean shipments from **40% to 80%** and supported more data-driven transportation decisions

IT / Data Intern | Plano de Saude Sao Lucas | Aug 2024 - Dec 2024

- Queried and analyzed **Oracle** databases with **SQL** for reporting and decision support; built **Power BI** dashboards and automated recurring reports with **Python** and Excel.
- Applied statistical and machine-learning techniques in exploratory analyses within Scrum, ITIL, and governance practices.

ADDITIONAL EXPERIENCE

Administrative Intern, UNIMONTES (May 2022 - May 2024) | **Finance Assistant**, Ideale Pneus (Feb 2022 - Apr 2022)

EDUCATION

B.Sc. in Computer Science | IFNMG | Expected Dec 2027

Technology Degree in Systems Analysis and Development | UNINTER | Expected May 2027

Business Administration coursework (degree not completed) | Federal University of Minas Gerais - UFMG | 2019 - 2023

CERTIFICATIONS

Google Advanced Data Analytics Professional Certificate | Coursera - 168 hours

Machine Learning Specialist | DIO - 92 hours

Power BI for Business Intelligence and Data Science | DIO - 72 hours

SELECTED PROJECTS

Enterprise Insights - NLP Prototype - Personal prototype using public data, NLP, and structured processing pipelines.

Python Voice Assistant - Speech recognition, text-to-speech, system automation, and web-service integration.

BioSeqResearchTool - C application for large nucleotide-sequence processing, pattern detection, and binary file handling.
